

Building a Custom CMS & Blog with Next.js 16

Complete with a secure Admin
Panel, Prisma ORM, and modern
web architecture.

Swipe to learn more 

The Problem with Traditional CMS

- Sometimes you don't need a heavy, bloated platform.
- You want complete control over your database schemas and UI.
- You want to leverage the latest Next.js 16 and React 19 features for maximum performance.

Under the Hood

- **Framework:** Next.js 16 & React 19
- **Styling:** Tailwind CSS v4
- **Database & ORM:** Prisma ORM
- **Auth:** NextAuth.js (Auth.js v5)
- **Validation:** Zod + React Hook Form

Seamless Content Management

- Secure login and registration system.
- Intuitive dashboard to Create, Read, Update, and Delete posts.
- Real-time cache revalidation when posts are published.

Built for Scale ⚡

- Full TypeScript support for type safety.
- Robust end-to-end testing integrated using Playwright.
- Database seeding with Faker.js for local development.

Check out the Code!

- The project is completely [Open Source](#).
